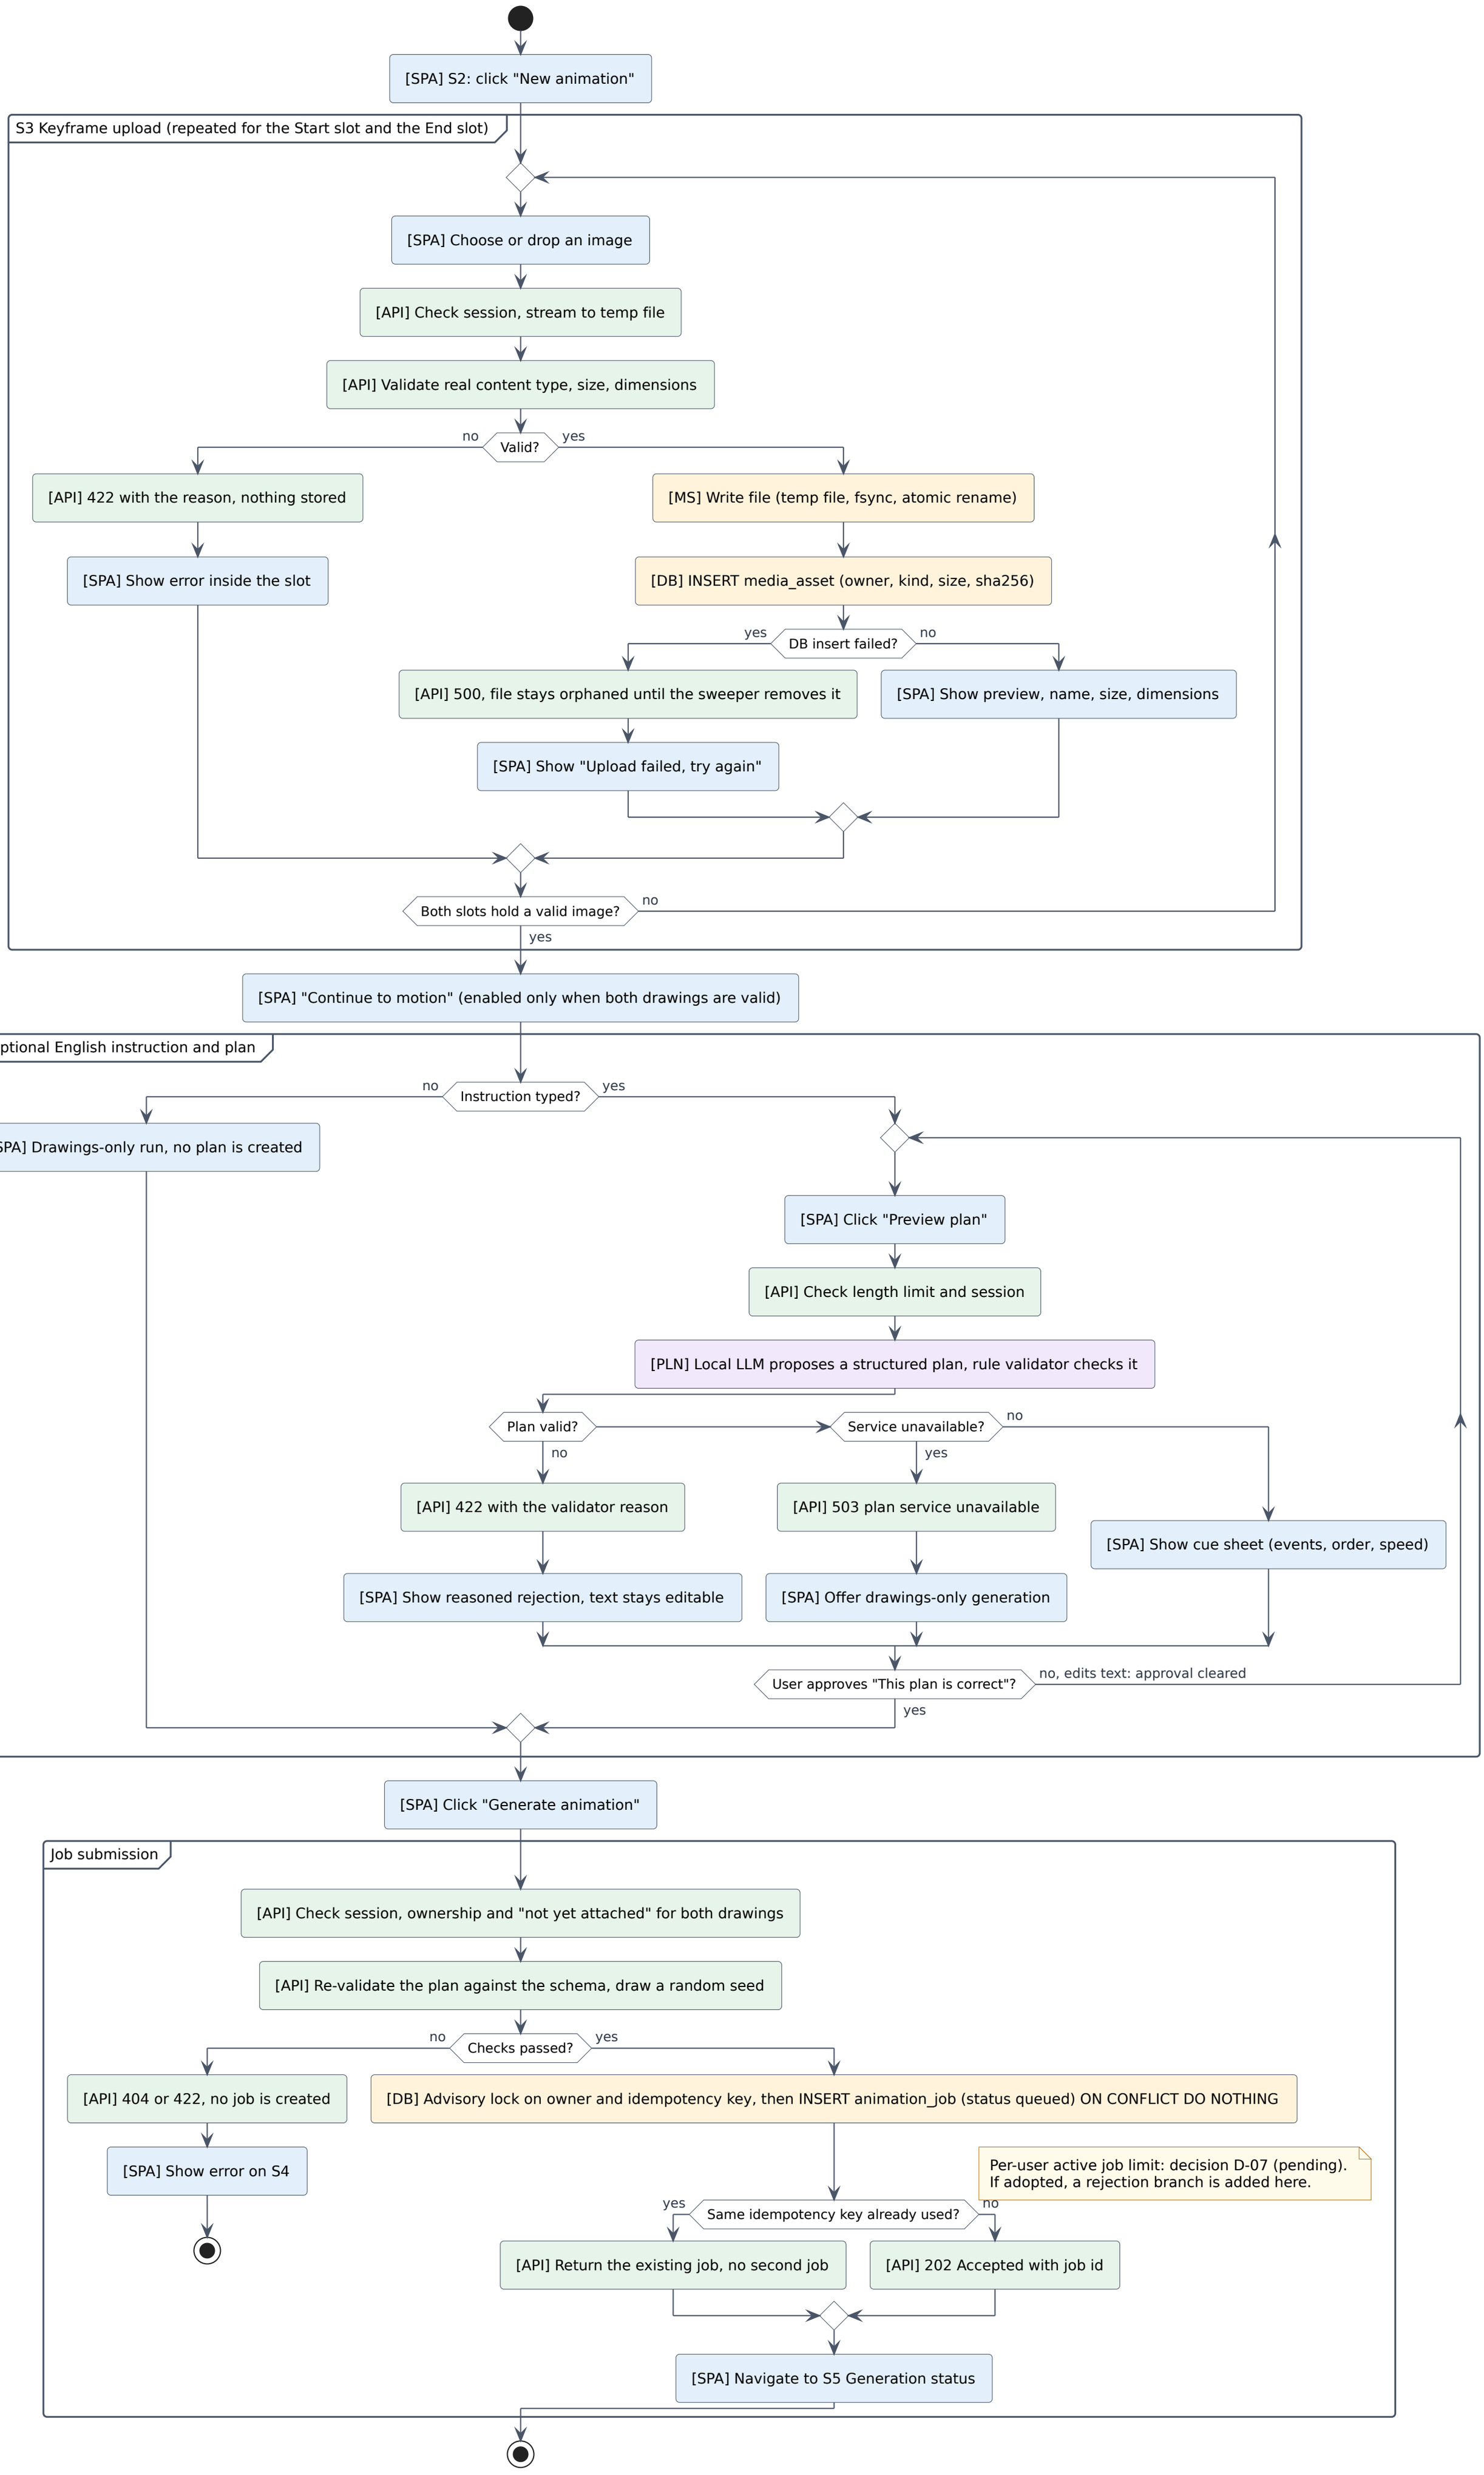
Cue — Animation Creation Flow (FR-03, FR-04, FR-05, FR-06)
Keyframe upload, optional English instruction, plan approval, job submission



Box colour = layer: blue SPA, green API, amber DB or media store (MS), purple plan interpreter (PLN).
Uploads happen before any job exists; unattached drawings are removed after 24 h (maintenance).
An empty instruction never calls the language model (FR-05 "generation without command").
