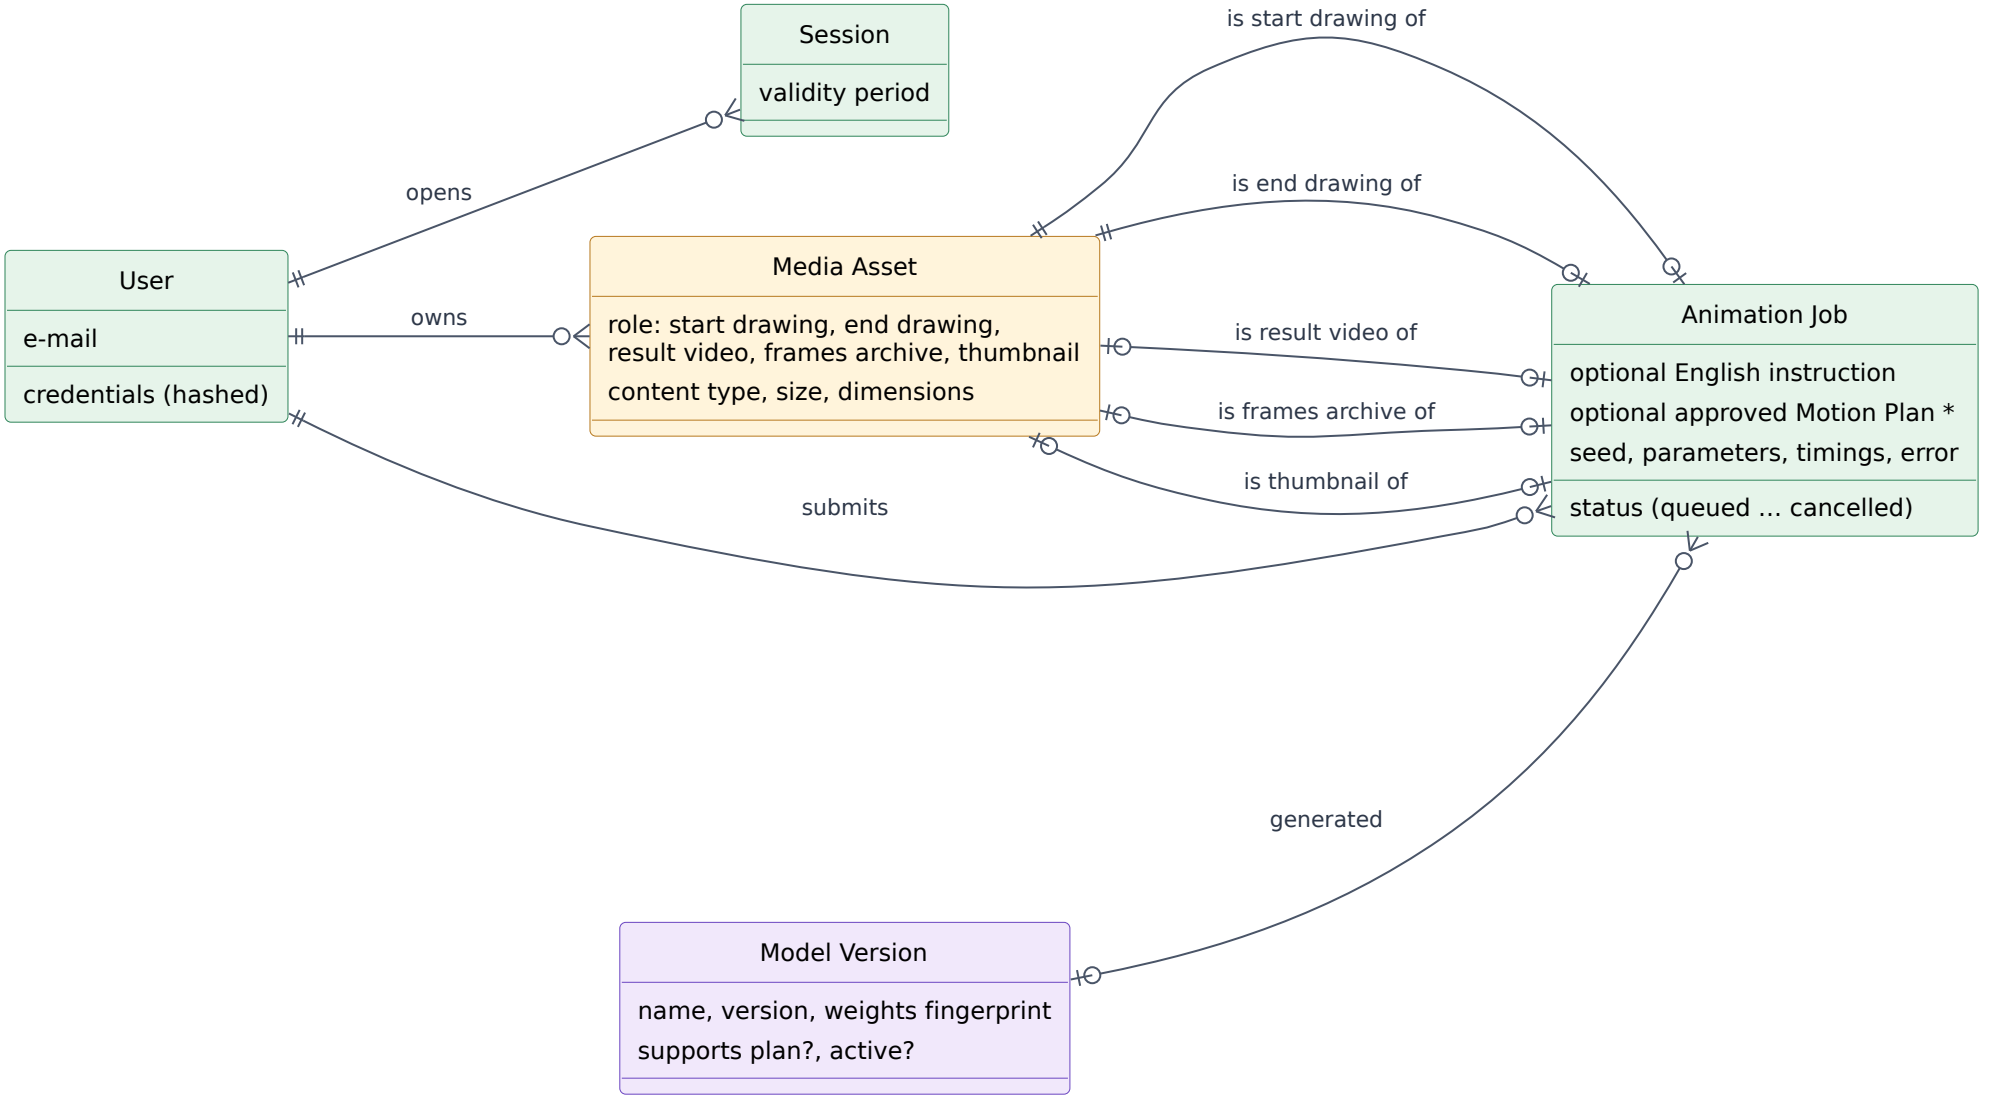
Cue — Conceptual ERD (business view)
Technology independent, no data types



• Motion Plan is an optional value embedded in the job (versioned JSON), not a separate entity.
A job has exactly two input drawings, at most one result video and one frames archive; an asset belongs to at most one job.
Both drawings must belong to the job owner. Uploaded drawings may exist before the job does.
Logical and physical detail are shown together in physical-erd (see reports/05).
