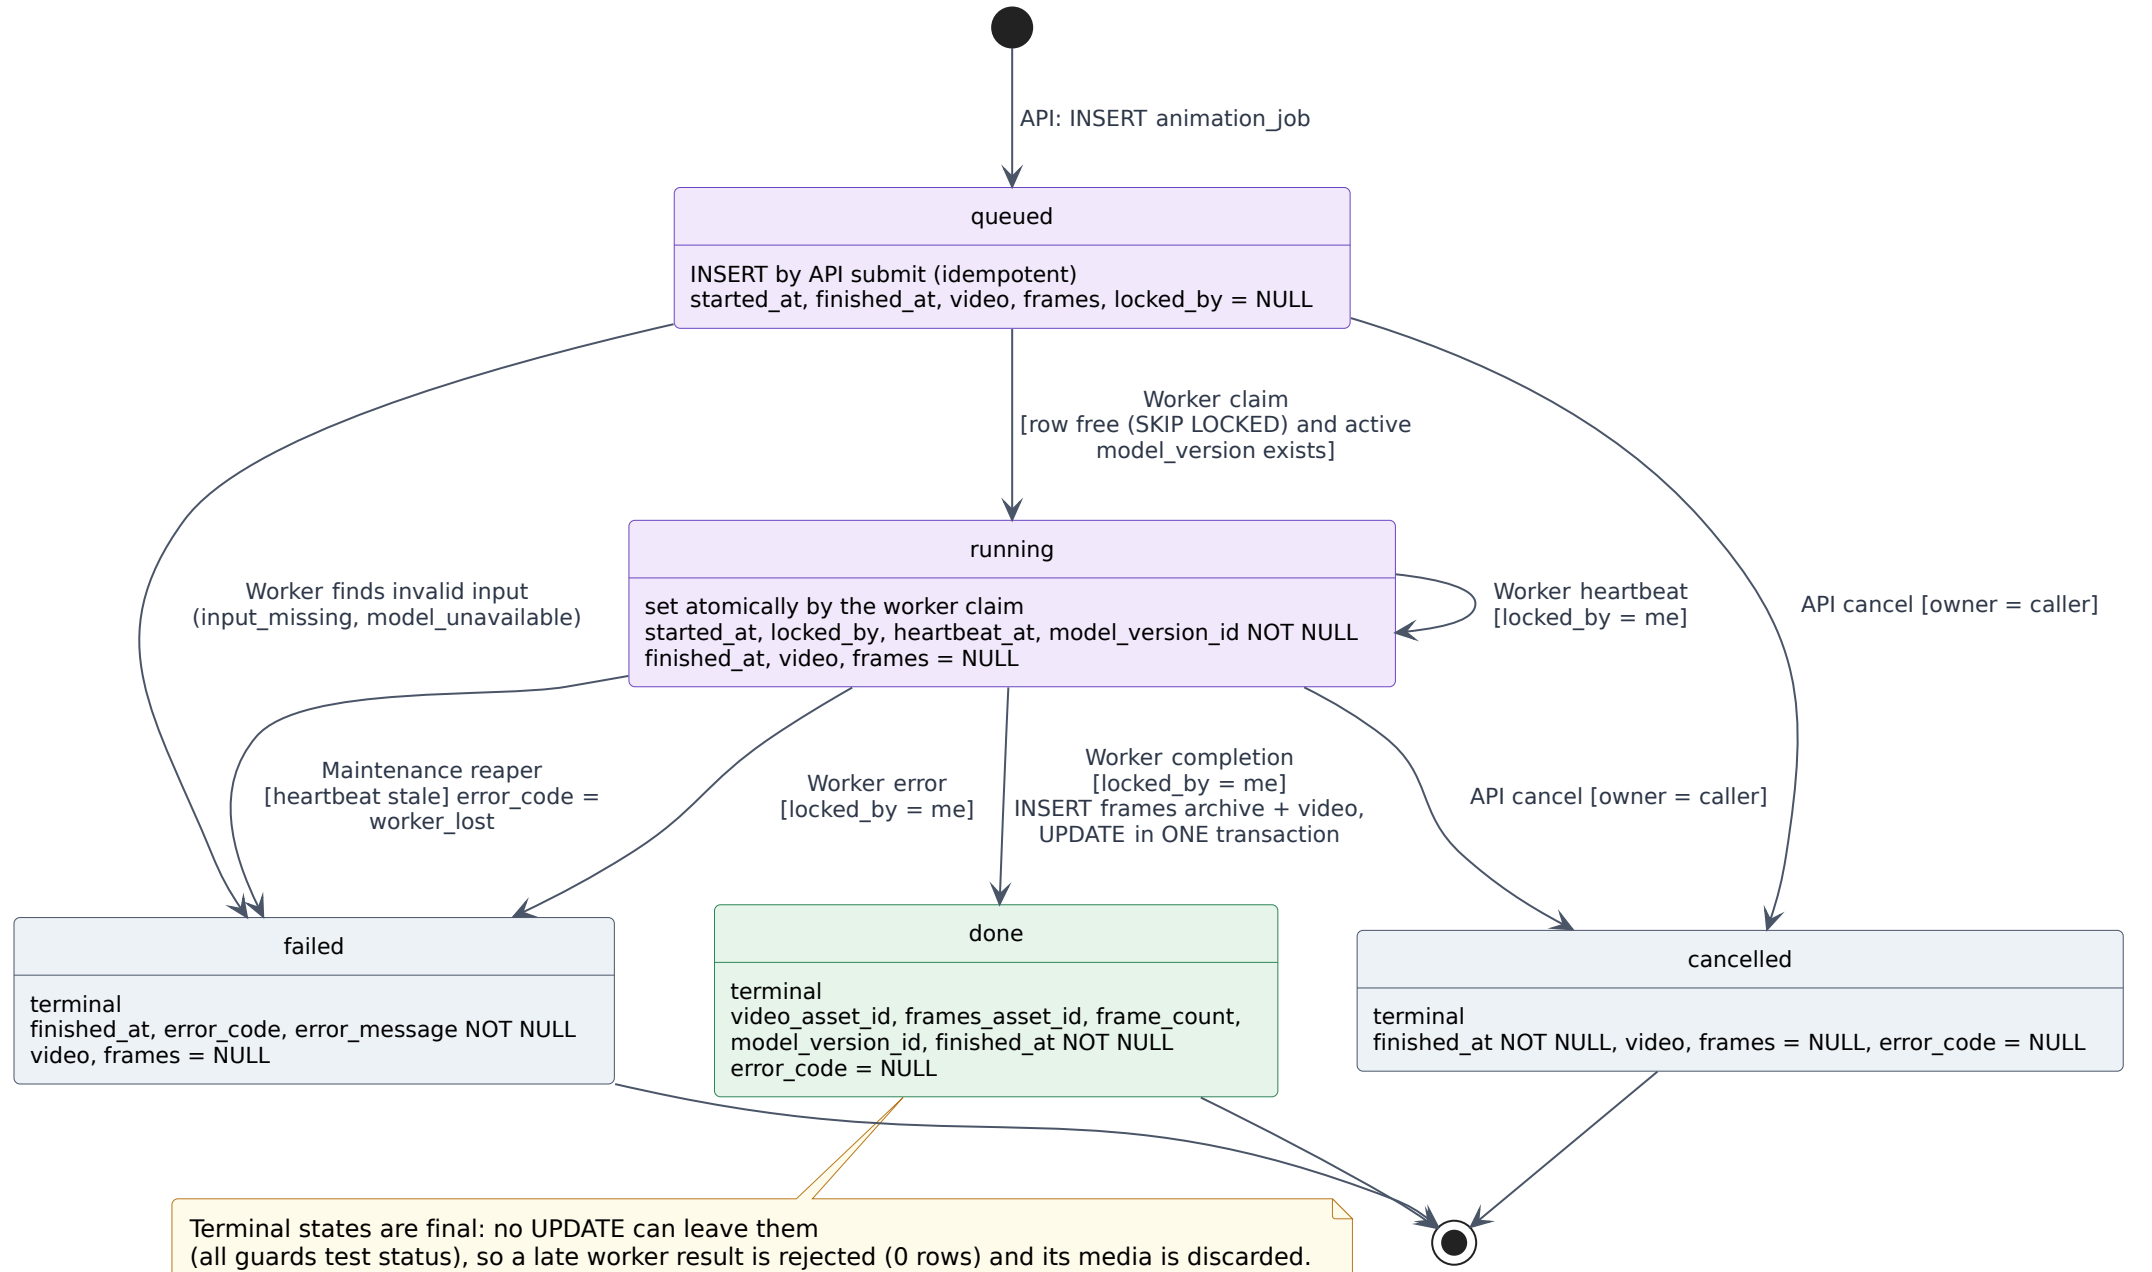
Cue — Generation Job State Machine (animation_job.status, FR-07, NFR-03)
Every transition is a conditional UPDATE "WHERE status = <expected state>"



Matches database CHECK constraints animation_job_state_queued / running / done / failed / cancelled and animation_job_status_valid (verified by database/validation tests).
Colours: purple = active (non-terminal), green = successful terminal, grey = failed or cancelled terminal.
Not drawn because not committed: retry, pause, draft.
